

NEWSLETTER VOL 6 Feb 2007.

Do Anything:

Building and reinforcing boat ramps for special work is not nominally in our standard scope of work. But here we go again.

To increase the capacity of the existing concrete ramp, numerous sheets of 20 mm plate were laid to accommodate the 500 ton load

From the Writer: Well the first month of 2007 is done and dusted “quick as a flash” and at last it looks like we will finally get some warm summer days, after having the coldest December and January in something like the last 30 years. “Global Warming Yeah right”.

Personnel Profile– Driveline.

Brendon North. (Bud)

Brendon has been with MGE for 6 years, and heads up our driveline service and repair shop. Brendon is automotive machinists by trade which has given him a wealth of knowledge and know how when it comes to problem solving on driveshaft work. Some what of a perfectionist you can always be reassured that the finished work from our driveline shop is second to none. Brendon also looks after our reconditioning division which does everything from water pumps to marine transmissions, “very busy guy”.

Robotic Welding

This is one of our welding units set up to weld hard face plate on to I beam strong backs for use as a machinery track . This type of machine comes into it own when the result required calls for uninterrupted welds with minimal of distortion. This machine is also portable which is great for in-situ repairs and metal reclamation work.

Slotting & keyways

Our slotting machine recently had a major overhaul, while this machine is quite a few years old now it was built in the days when weight was not compromised for rigidity and strength. Pictured is a new wear ring having four internal keyways machined.

Coming Up

In our next Newsletter “The Engineers Crossword”, prizes to be won. The Bamford returns to life.

Our Mission

To produce the highest standard of engineering services to our clients. Meet their on going requirements and achieve total customer satisfaction, through consistent quality and innovative solutions at a realistic cost.
